

20 APR 1977

Mr. James B. Stewart  
Acting Director  
Construction Management Division  
Regional Public Buildings Service  
General Services Administration  
Washington, D. C. 20407

Dear Mr. Stewart:

Reference is made to your letter of 18 February 1977 in which you requested identification of the location of the proposed computer center by 31 March 1977. This letter is to confirm discussions between Messrs. [redacted] and [redacted] of my staff and your project coordinator, Mr. Frank Miles, on that date which reviewed the project sequence and described its location in detail.

Enclosed is an annotated portion of the building plan which details the computer center ground floor location in the northeast corner of the Headquarters Building, its supporting Uninterruptible Power Supply system, and its relation to electrical Vault C which will be expanded under a separate contract.

Sincerely,

[redacted]

Chief

Real Estate and Construction Division, OL
